

Shishir R Kulal

Mangaluru, Karnataka, India | +91 779131776 | shishirkulal1234@gmail.com

[linkedin](#) | [github](#) | [Portfolio](#)

AI/ML and Full-Stack Developer with hands-on experience in deep learning, computer vision, and scalable web applications. Skilled in Python, React, FastAPI, and Docker, with proven ability to deploy ML models into production environments. Passionate about building real-world AI solutions and collaborative development.

EDUCATION

Srinivas Institute of Technology

Bachelor of Engineering in Computer Science and Design

Mangalore, India

Sept. 2023 – Sept. 2027

St Aloysius PU College

PCMS

Mangalore, India

June 2021 – May 2023

TECHNICAL SKILLS

Languages: Python, C, JavaScript, TypeScript, Java

Frameworks: React, Next.js, FastAPI, Flask, React Native, Flutter

Developer Tools: Docker, Git, DevOps Pipelines, AWS, Raspberry Pi, Kubernetes

AI/ML: Deep Learning, Computer Vision, OpenCV, Hugging Face, Data Analytics

EXPERIENCE

Project Intern

Dhaarini Academy

April 2025 – Nov. 2025

Remote/India

- Spearheaded full-stack application development and deployment using modern web technologies.
- Collaborated with cross-functional teams to implement machine learning and deep learning models into production environments.

PROJECTS

Avian Weather Net | *Python, Deep Learning, React*

- Developed a deep learning model to predict weather patterns based on bird sounds with high accuracy.
- Built a full-stack interface using React to visualize real-time weather data and acoustic analysis.

Plant Disease Detection | *Computer Vision, Python, OpenCV*

- Engineered an AI-based agricultural tool to diagnose plant diseases and provide fertilizer recommendations.
- Implemented computer vision algorithms to process leaf images, reducing manual inspection time significantly.

War Room | *React, WebSockets, Node.js*

- Created a real-time command center for hackathons to manage team progress and rapid development tasks.
- Integrated live data streaming to monitor project milestones and resource allocation during sprints.

Emergency Mesh | *React Native, WebSockets, Offline, Bluetooth sharing*

- Created a real-time emergency app which works offline to send messages within the area to alert people.
- Integrated offline emergency app to alert people just from Bluetooth and Wifi.

CERTIFICATIONS

IT Specialist - Data Analytics

Java Full Stack Development Certification

UI/UX - IBM Professional Certificate

Kaggle - AI/ML Specialization
